

MEI SPA

## SUPERFOOD SKIN RITUAL OUR ADVICE

A ritual that - literally - nourishes your skin, realized by preparing, on the spot, dehydrated cosmetics like the ingredients of a beauty recipe.

With just one session your skin will look radiant and smooth, while to counteract relaxed skin (inner thighs, breasts, under arms) and skin discoloration a protocol of 4 to 12 sessions will be required, based on the intensity of the blemish to be treated.

The professional treatments are completed with the application at home of the Peel-Off Alginate Mask at least twice a week and the Superfood Body and Face Peeling once a week.

Now you can nourish the skin, body and spirit like never before, because at MEI - since 1988 - we believe that beauty and well-being are one and the same.

Skin Ritual

## SUPERFOOD SKIN RITUAL FACE AND BODY LIFT & WHITENING

A beautiful treatment that firms and tones sagging areas and counteracts skin discoloration.

The ritual opens with aromatherapy with Mediterranean cedar essential oil, with toning and lipolytic properties, followed by a massage with the Superfood Peeling with mango, goji and grape seeds with a lifting action.

The Peel-Off Masks with Diatomaceous Earth and alginates are activated with a firming vitamin C complex and a whitening white mulberry complex. During the leave-on time of the mask, your beautician will perform joint maneuvers that enhance the regeneration of the elastin-collagen tissue.

The treatment is completed with a facial massage with apricot essential oil cream and an unforgettable, sensory and firming final touch, with wild fig mist.

SUPER  
**food**  
SKIN RITUAL

“Superfoods” are good for our health and skin, they keep us young for longer and strengthen the immune system. Their bio-molecules become protagonists, not only of the food diet, but also of the "skin diet", with a beauty routine to fill up on retinol, polyphenols, vitamins C-E, transformed into organic phytocosmetics.

## Respect for the environment and eco-sustainability are a MEI must.

When your Superfood cosmetics run out, DO NOT THROW away the packaging and return to your local center for a refill. The products were designed in anhydrous form - without water - to be perfectly stable over time. The glass jar and wooden lids complete the totally sustainable line.

## SUPERFOOD SKIN RITUAL THE PRODUCT RANGE

### Regenerating and Lifting Face & Body Scrub

Once a week mix 1 or 2 tablespoons with water and massage your face and body. Mango, rice and silicium nourish your skin, while grape seeds provide precious smoothing and regenerating polyphenols.

### Lifting and Push Up Vitamin C Peel Off Mask

Mix with enough water and apply the mask based on diatomaceous earth, goji, turmeric and acerola with a spatula on the areas that have lost tone and firmness. Once dry, remove by taking an edge of the mask and peel it off, then spray the Wild Fig Mist and complete with the specific cream. Recommended frequency: twice a week.

### Tonifying and Firming Wild Fig Face and Body Mist

After the Scrub and at any time you want a regenerating effect on your skin and mood, spray and tap the Wild Fig Mist with notes of citrus fruits, peach blossoms and red fruits. Also ideal after sauna or Turkish bath.

### Whitening White Mulberry Alginate Peel Off Mask

Mix with enough water and apply the mask based on diatomaceous earth, grape seeds, saxifrage and white mulberry with a spatula on the areas affected by blemishes and skin discoloration. Once dry, remove by taking an edge of the mask and peel it off, then spray the Wild Fig Mist and complete with the specific cream. Recommended frequency: every other day.

### Apricot Moisturizing and Softening Face Cream

It is a delicious day/night cream, suitable for all skin types, also recommended for the neck and décolleté. Thanks to aloe juice and cucumber pulp, it gives a fresh feeling, while having a nourishing texture and being powerfully rich in vegetable retinol / antioxidant vitamin A.
